

Your eyes are a window to your health.

Take a closer look with **optomap**.

Traditional View

optomap® view

 **optomap®**
ultra-wide digital retinal imaging

optomap® is the only exam that captures more than 80% of your retina in one panoramic image. The unique **optomap®** ultra-wide view helps your eye care professional detect early signs of retinal disease more effectively and efficiently than with traditional eye exams alone. The exam is fast and pain-free and nothing touches your eye.

Helping you maintain healthy eyes.

 **optomap®**
ultra-wide digital retinal imaging

This device is intended for operation by trained optometrists only. Your optometrist will advise you whether the optomap exam is suitable for you. Use only as directed. PN GM00192 / 1
